TABLE OF CONTENTS

LETTER FROM THE SHORT NOTE EDITOR, EUROMICRO 87 v

C4: HARDWARE DEVELOPMENT AND DESCRIPTION: Finn Grønbæk, Chairman 1

A System for Verification of Interactive Microprogram Transformations
R. Rauscher and J. Westendorf 3

A Table-Driven System Controller with Multi-Way Branching
V. Dvorak 9

A Technology Description Method for Generalized Layout / Circuit Relations
J. Blödel, R. W. Hartenstein, W. Nebel and M. Ryba 15

Control Store Minimization on the Design of Microprogrammed Controllers
Yau-Hwang Kuo, Being-Yuh Hwang and Ling-Yeung Kung 21

Logic Design Using the PLAs with Limited I/O Pins and Product Terms
Yau-Hwang Kuo, Ruey-Rong Wang and Ling-Yeung Kung 27

Processor Control Part Synthesis Using Effective Partitioning Algorithms
H. Mahler, H. Lieb and U.G. Baitinger 33

A University Framework for Correct by Construction IC Design
T. Grabowiecki, A. Pawlak and W. Sakowski 37

C5: VLSI: Helmut Painke, Chairman 45

An Expert System for Chip-Architecture Planning
K.-H. Temme, R. Felix and J. Herrmann 47

A Heuristic Approach to Analyzing VLSI Modules
F.J. Schmitt 51

DISCDA – A Digital System Controller Design Assistant
K.W. Ng 57

Error Detection in Serial Multipliers and in Systolic Arrays: An Approach Based upon A*N Codes
V. Piuri, R. Stefanelli and G. Traverso 63

Fast Evaluation of Design Alternatives – A New Approach for Exploratory Chip Design
H. Endriss, G. Klein-Hessling, G. Lawitzky and B. Schallenberger 75

LIMES – LearnIng Module EStimations
J. Herrmann 81

Parallelism Extraction from Sequential Programs for VLSI Applications
K. Kuchcinski and Z. Peng 87

D4: IMAGE PROCESSING AND ROBOTS: Sam Ben-Yaakov, Chairman 93

A DAISY Architecture for Abstract Data Type Implementation in Image Processing
M. Alderighi, L. Mantoani and G.R. Sechi 95

ANAGNOSTIS – An Automatic Text Reading System
N.G. Bourbakis 103

An Efficient, Parallel-Symmetric Thinning Algorithm and its Hardware Implementation
N.G. Bourbakis and Won Jang 115

A Multi-Microprocessor System for the Control of Robot Welders
M. Al-Mouhamed and H.A. Almohammad 123

An Independently Working Computer Peripheral Generating Robot Arm Trajectories
W.A. Halang and S.-K. Jung 129

Low-Level-Vision in an Autonomous Mobile Robot
R. Hinkel 135

D5: EXPERT SYSTEMS: Ferenc Vajda, Chairman 141

A Co-Processor for Unification in Prolog: The Microprogramming Level
M. De Blasi and A. Gentile 143

A Network of Transputers to Emulate a Parallel Symbolic Processor
G. Goncalves, M.P. Lecouffe, B. Toursel and S. Niar 149

A CAMAC Crate Controller for the IBM PC/XT Family Computers
with Built-in Selftest Features
I.N. Churin and A. Georgiev 153

E4: SYSTEM ANALYSIS AND PERFORMANCE: Daniel Tabak, Chairman 155

An Abstract Description Generator for the Reliability Analysis in the Design
of Real Time Systems
E. Binaghi, L. Lisca, A. Proserpio and G.R. Sechi 157

An Improved Signature Analysis Based CPU Self Test
A. Pataricza 167

CDDT – Concurrent System Operation Display and Debugging Tool
Z. Mital 173

Floating Point Arithmetic on a RISC
J.M. Davila, A.J. Phillips and D. Tabak 179

Performance Evaluation Method for Interprocessor Interrupts by Message Passing
S. Fukami 185

Reliability of Disk File Organisation for Microcomputers
K. Goczyla 191

E5: DIVERSE TOPICS: R. Negrini, Chairman 197

A Model for Assessing the Performance of a Local Area Network Employing Technical Office Protocol (TOP) as Part of MAP/TOP Network in a Computer Integrated Manufacturing (CIM) Research Project, for the Transmission of Real Time Interactive Speech
B.M. Lines 199

Microprocessor Real-Time Emulation
S. Marić, P. Drinić, R. Čajavec and B. Luka 203

Synthesis of Minimal Multivalued Decision Diagrams
V. Dvorak 207

F4: MULTIMICROPROCESSORS: ARCHITECTURE AND DESIGN:
Derek R. Wilson, Chairman 213

A Module-Based Assembly Language with Parallel Processing Constructs and its Implementation in the ASTOR Architecture
E. Zehendner 215

A Multiprocessing System for the TMS32020
L. Viera de Sá and F. Perdigão 221

ASTOR - An Architecture for Special Purpose Processing Units with Distributed Control and Message Passing
T. Ungerer 227

Communication Kernels – A High Level Synchronization Primitive Supporting Error Handling
P. Kranenburg 233

CRISC – Configurable Reduced Instruction Set Computer or Complex Reconfigurable Instruction Set Computer
E. Dirkx 239

Distributed Interconnection of a Reconfigurable Multicomputer System
T. Äijänen 243

Dynamically Reconfigurable Multi-Transputer Systems
P.K. Das and D.Q.M. Fay 247

Network Topology – A Critical Factor in the Implementation of Algorithms Intended for Efficient Execution on a Transputer Network
P. Milligan, N.S. Scott, D. Crookes, P.L. Kilpatrick and P.J. Morrow 253

F5: CONCURRENT PROCESSING: Jukka Karjalainen, Chairman 259

Achieving Atomicity in OCCAM
H. Zedan 261

A Microprogrammed Machine for the Concurrent Euclid Language
K.W. Ng, H.C.P. Lam and K.Y. Mok 267

A Sorting Processor for Microcomputers
E. Jovanov, T. Aleksić, Z. Stojkov and D. Starčević 273

A System Service for Distributed Programming and Execution in Communication-Oriented Distributed Operating Media
L. Manasiev and R. Stainov 279

Task Scheduling Programming System for the Delft Parallel Processor
J.H.M. Andriessen 283

G4: SOFTWARE ENGINEERING: Malcolm J. Taylor, Chairman 289

Alchemy Model: An Operating System Model for a Microcomputer-Based, Heterogeneous Processing Configuration
S.J. Pratt 291

A Portable Query Language for Small Scale Systems
M.P. Papazoglou 299

Dimensional Design: A Software Engineering Tool for the Design of Concurrent Systems
M. Coleman and S. Pratt 305

Requirements for Coupling Small Scale DBMSs in a Distributed Office Environment
M.P. Papazoglou and L. Marinos 311

Support Environment for the Development of Problem Oriented Concurrent Systems
I. Giulio, M. Antonino and S. Carlo 317

G5: HARDWARE ASPECTS AND APPLICATIONS: F. Bruggeman, Chairman 325

A Digital Method of Demodulation and Filtering for Angular Errors in Conical Scan Tracking Radars
A.R. Guesalaga 327

An Intelligent Microprocessor Interface for a Low-Cost Digital Magnetic Tape Recorder
T. Donnelly, D.J. Mapps and R. Wilson 333

Control of Motors by Microprocessors for Space Positioning and Localization
J. Shi, S. Monchaud, R. Prat and I. Kas 339

Computerised Telephone Metering System
D. Raja, R. Shanthi and S.R. Rao 345

Distributed Intelligence and Bus Hierarchy System Implementation for a Highly Intelligent Workstation
I.V. Vojvodić and P.A. Vranеš 351

H4: PC BASED WORKSTATIONS: Jozef de Man, Chairman 355

A Personal Computer Based Graphic Workstation
K. Bruck, A.S. Kirilov, D. Krushinsky, V.I. Prikhodko and K. Voigt 357

Graphics Fundamentals for a PCB-CAD PC System
J. Berce 359

H5: NETWORK ASPECTS: W.A. Halang, Chairman 365

Implementation of the Connection Oriented Network Service on a LAN
D.J.J. van Bruchem, J.B. Roubos and B. Schellingerhout 367

Some Issues on Management of Application Connection Establishment
R.M. Kaszuba 373

Task to Task Communication and Resource Sharing in a Geographically Distributed Network
M. Spalla, A. Fornasiero, F. Della Rosa and M. Pavan 379

Subject Index to Volume 23 385

Author Index to Volume 23 387
